Subject: Lindsay Light II

POLREP #: 2

II. BACKGROUND

Site ID: ZA
Response Authority: CERCLA/ENFORCEMENT
UAO Date: June 6, 1996
NPL Status: Non-NPL
Start Date: October 21, 1996

III. RESPONSE INFORMATION

A) Current Situation

Work Orders prepared from delineation work state contamination is on property owned by the City of Chicago and The Chicago Dock & Canal Trust. Work on City of Chicago property should involve about 150 lin. ft of sidewalk along Illinois Street and 50 lin. ft of sidewalk along Grand Avenue and the depth will vary from 0.5 to 7.5 ft. Work on Trust property will involve about 6 distinct areas at depths ranging from 0.5 to 10 ft.

Delineation work has confirmed the presence of hydrocarbons on-site and one on-site borehole did exhibit both hydrocarbon contamination and radiation. Also, one of the boreholes in Illinois Street showed 50 pCi/g to a depth of 7.5 ft.

IV. OTHER INFORMATION

On October 18, the site-specific and radiation training was held. Removal contractors mobilized to the site on October 21, 1996. Between October 22 and November 30, 1996, Kerr-McGee expects to ship approximately 4,000 cubic yards to the Envirocare disposal facility in Utah.
